What's New in the The Castle 039;s Video Server?

Castle's Video Server allows for a simple and easy to use interface into directories of video files stored on local, remote or removable drives. Castle's Video Server supports file playback through Windows Media Player 9. When used with Media Player 9, the Player plays .avi files. When used with Player 8,.avi

files may work, but may have a very poor performance. If you're having trouble with .avi files, try the .mpeg format instead. The server uses a simple frame by frame display for playback. There is no point and click or browse menus, the user must know exactly where the files are on their drives to see them.

Additionally, the files must be copied into the `vs_sample/video` directory for the server to access them. Getting Started: The

process to start the server from the command line is the same as any other executable. The location of the executable is configured by an environment variable `VS_CMD`. If you start the server from the command line, `VS_CMD` is set to the path to the executable, which is used as `VS_CMD`. If `VS_CMD` is not set, the executable will be located in `C:\Program Files\Castle's Video Server\vs.exe`. If `VS_CMD` is set, a new copy of

VS_CMD.exe will be created with the correct path. The first time you start the server from the command line, it will ask for confirmation as to whether to start the server as a Windows service. This will be stored in the registry at HKEY_LOCAL_MACHINE\SOFTWARE\Castle's Video Server\Config\VC_Service. If you have the VS_CMD environment variable set in the registry, you will not need to

answer the question the first time
you start the server.

System Requirements For The Castle 039;s Video Server:

Minimum: OS: Windows XP or
later Processor: 800 MHz

processor Memory: 128 MB

DirectX: 9.0c Recommended:

Processor: 1 GHz processor

Memory: 256 MB Important:

Game Discs: A disc containing
the game installation Keyboard:

Standard USB keyboard Pre-

Requisites: Game will not run on
OSes below Windows XP, or
those with
