Tap on the 'About' section to view the latest version information and user comments. Activate the 'Localization' feature by tapping on the 'Language & Locale' option and select a

Phrasebook

Comes with an intuitive and easy to navigate UI The application does not require installation and you can decompress the archive on any desired location on your hard drive. Moreover, since the app does not have high system requirements, you can use it on an older computer or laptop that you are considering taking with you during your travels. The program comes with an unpolished and outdated interface, yet it is user-friendly and well

organized. You can select the known and unknown language from the upper section and then the topic as well as the question, sentence or words from the drop-down boxes. It should allow you to add new words and phrases. It is necessary to mention that you can set the application to pronounce the phrases as many times as you need and at different speeds. You can set the lowest and highest desired speech speed and then listen to the words until you can learn them. The option can come in handy if you are visiting a country known to have different dialects and where people are likely to speak fast or slow. On the other hand, the application does not allow you to add new words or sentences that you are learning during your travels. Moreover, the app supports only a handful of languages, namely different variations of English, German, Spanish, Russian, Portuguese and Serbian. An app that can help users traveling to a new country. While it is not a looker, the application is user-friendly and includes dozens of words, sentences and questions you are likely to use when arriving at a region you have never visited before. All in all, Phrasebook could come in handy for practicing your language skills when traveling to a new country. Features: Following features are present in Phrasebook: - Over 60 languages - Translate across 60 languages - Learn over 100,000 words - Introducing a new word every 2 seconds (requires internet connection) - Record phrases in Russian (Русский), Korean (한국어), German (Deutsch) and English (English) - Introducing a new word or phrase every 2 seconds - 8x faster processing than Google Translate

I was looking for a way to send & receive Wifi password & Wifi key from my iPhone to iPhone on PC. This software was found on internet and I tried it with 99.9% success. Wifi Key Explorer is designed for Internet Surfing and Wifi Password Exchanging. It
